

Episcopal Church of the Good Shepherd Burke, Virginia

The pipe organ at Episcopal Church of the Good Shepherd in Burke, Virginia is 25 ranks on a three-manual console, undergirded with one 32' and three 16' registers. This instrument was rebuilt using existing pipework, with rescaling, voicing and new pipework, plus a new console, and new exposed Great division and facade. The modified specification with expanded resources was designed to fully support the congregational worship as well as a broad scope of organ literature. The instrument is positioned in the front of the church above the choir. The white oak terraced console has a mahogany interior.
