

Victorian Era Tracker Pipe Organ Available

This 2-manual Pilcher pipe organ was built in the late 1800s, and was originally powered by water. The photo above, taken in the early 1900s, captures the beauty of this instrument, which is being replaced with a new pipe organ being built by our firm. With rebuilding, it will be ready for a new home. Visualize this handsome instrument in your own setting, and contact Arthur (see below) for more information.
